H.S.C
76.00%
- Mahatma Jyotiba Phule Vidyalaya, Sinnar** 2017
S.S.C
82.60%

Projects

- Indian Sign Language Detection Android Application**
 - With this project we are aiming to create an android application that will be helpful to interact with the dumb and deaf people.
 - We tried to integrate Android development and Machine Learning.
 - Python programming language is used for the backend and Flutter is used for the creation of the android application.
 - It is a real time detection app that tracks the user sign using the Camera and then predicts the sign as per the model trained.
- URL Shortening using flask**
 - URL Shortening is used to short the long Url's and provides us the small url.
 - With the help of python and flask it shorts the url.

- **Personal Portfolio Website**

- Created the personal portfolio website using HTML and CSS.

Skills

- Programming Languages : Python , C , C++
